-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This communication is responsive to your preliminary amendment filed 8/23/04. Claims 1-32 are currently pending in this application.

Drawings

2. The drawings are objected to because all rectangular boxes in Fig. 7 should be labeled with a legend, such as "AMPLIFIER", "SWITCH", etc. See 37 CFR 1.83. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Laukien P.N. 3,774,103.

Laukien discloses a Nuclear Magnetic spectroscopy system. Applicant's attention is directed to Figures 1 and 2 and their corresponding description.

A substantially homogenous main magnetic field is generated in a measurement region containing the volume of the sample 6 using a main field coil 3 which encompasses the measurement region, which main field aligns the atomic spins of the sample longitudinally with respect to the field lines and has an amplitude progression in the form of at least one pulse (Fig. 2 (a)) which follows a defined time function within a defined time window; from a point in time before or at the commencement of the defined time window the sample 6 is subjected to a high frequency electromagnetic excitation pulse (Fig. 2 (b)) whose frequency band, amplitude and duration are selected such that within the time window a magnetic resonance signal appears; the temporal progression of the magnetic resonance signal is measured and its spectrum is analysed 24.

Laukien meets all the limitations of the claims at issue.

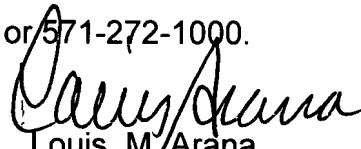

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mackovski '734 and 776 discloses MR devices that use pulsed polarizing fields. Note the abstract of each disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Louis M. Arana whose telephone number is (571) 272-2236. The examiner can normally be reached on M-Thurs. Fridays Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diego F. Gutierrez can be reached on (571) 272-2245. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
